Physical Presentation

Physical Stances

There are several key postures in which you tend to sit and stand in.

Your most important sitting posture is when you cross your legs, right knee over your left knee. You usually sit in this position during class, or other formal moments.

The Quantified Spouse Movement Has Couples Tracking Weight, Sleep And Even Orgasms To Find Bliss

Silicon Valley entrepreneur Dave Asprey put himself on a strict orgasm diet last year — not because of religious beliefs or health concerns, but in pursuit of data that would reveal the optimal rate of ejaculation to maximize well-being. For several months, he allowed himself no more than a single ejaculation every eight days. He then graphed orgasm frequency against his overall life satisfaction, measured daily, to see how one affected the other.

Asprey’s significant others haven’t escaped his drive for data. At night, he and his wife strap Zeo sleep bands on their foreheads to track the quality of their rest, and they have started sleeping in separate beds several nights a week to avoid disturbing each other’s rest. He encourages husbands to track their wives’ ovulation cycles along with the frequency of their fights to better understand what disrupts marital bliss. In a previous relationship, Asprey tracked everything his

Steve Mann
Steve Mann’s “wearable computer” and “reality mediator” inventions of the 1970s have evolved into what looks like ordinary eyeglasses.
Adam Harvey, CV Dazzle research
“The 3rdi arises from a need to objectively capture my past as it slips behind me from a non-confrontational point of view. It is anti-photography, decoded, and will capture images that are denoted rather than connoted, a technological-biological image. This will be accomplished by the complete removal of my hand and eye from the photographic process, circumventing the traditional conventions of traditional photography or a disruption in the photographic program.”
